“

As a beginner designer (not a designer at all to be honest) everything seemed very clear to me. Good examples for illustrating the speech. Some are very funny. Good voice tone and pronunciation. I Learned a lot about shapes and how to design using this software. Overall I would recommend this lesson. Interesting course

This course provides a nice introduction to Cinema 4D. Although it does go deeper it also does provide a good start for beginners looking to explore this powerful and versatile software. The course approaches Cinema 4D primarily from a designer or illustrators perspective. Overall this course is a good way to get started.
